SUBUNIT: Homotetramer (By similarity).
SUBCELLULAR LOCATION: Lysosomal.
DISEASE: Defects in GUSB are the cause
type VII (MPS VII), an inherited diseas
cats, and dogs.
SIMILARITY: Belongs to the glycosyl hyd
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       CANFA

Patent No. 6641996

GENERAL INFORMATION:

APPLICANT: Richard A. Jefferson and Jorge E. Mayer

TITLE OF INVENTION: MICROBIAL -GLUCURONIDASE GENES, GEI

TITLE OF INVENTION: PRODUCTS, AND USES THEREOF

FILE REFERENCE: 190106.405C1

CURRENT APPLICATION NUMBER: US/09/270,957

CURRENT FILING DATE: 1999-03-17

NUMBER OF SEQ ID NOS: 112

SOFTWARE: FastSEQ for Windows Version 4.0

SEQ ID NO 21

LENGTH: 563

TYPE: PRT
                                                                                                                                                                                         g

Sequence 15, Application US/09270957

Patent No. 6641996

GENERAL INFORMATION:
APPLICANT: Richard A. Jefferson and Jorge E. Mayer
TITLE OF INVENTION: MICROBIAL -GLUCURONIDASE GENES, GENETITLE OF INVENTION: PRODUCTS, AND USES THEREOF
FILE REFERENCE: 190106.405C1
CURRENT APPLICATION NUMBER: US/09/270,957
CURRENT FILING DATE: 1999-03-17
NUMBER OF SEQ ID NOS: 112
SOFTWARE: FastSEQ for Windows Version 4.0
SEQ ID NO 15
LENGTH: 602
TYPE: PRT
CORGANISM: Bacillus sp.
